You can use the search bar to find your document, or you may scroll through until you find what you are looking for. To save a document to your favorites click on the star, it will turn yellow and from now on when you open documents, your stared documents will be the only ones that appear, unless you hit the "show all" box.

By selecting the document that you want, it will launch you into that document.

\*Don't forget to hit the star  $\star$  those documents, or notes that you use all the time, and they will be saved as your favorites and will be at the top of your list next time you search.
