

CARE4 MODULE NAME: EMR/Web Acute

GROWTH CHARTS

Overview

Growth charts allow providers and nurses to view the pattern of children's height and weight gain over time and whether they are developing proportionately.

Growth Charts in MEDITECH Expense are viewable in the EMR. They populate automatically from height/weight and measurement documentation. The charts cross all patient visits from 0 to 20, are sex specific, and display data on the charts regardless of which accounts are actually selected to view in the EMR.

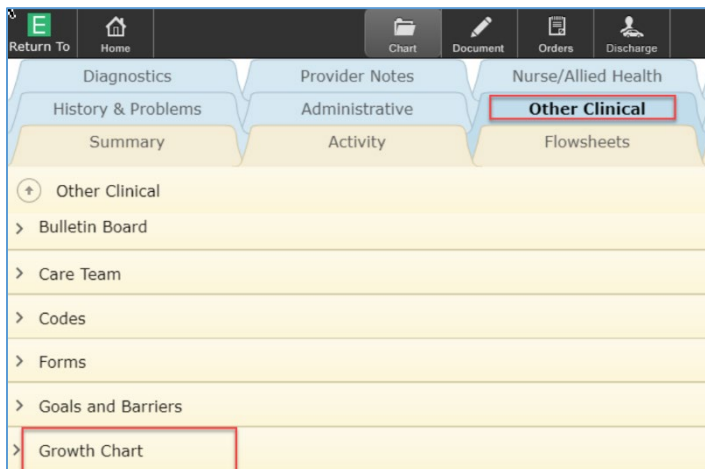

PCS/EDM

- Open Patient Chart and Select Summary
- Select Growth Charts

Web Acute

- Open Patient Chart and Select Other Clinical
- Select Growth Charts

- Ensure "3/97" is selected
- Metric defaults but can toggle to English

PCS/EDM – footer buttons

Web Acute – header buttons

Print – Select All or Current

Note

Ages 0-2 years, the following will be available (WHO Charts)

- Head Circumference for Age
- Length for Age
- Weight for Age (Infants)
- Weight for Length

Ages 2-20 years – in addition to the above, the following will be available (CDC Charts)

- Body Mass for Age
- Stature for Age
- Weight for Age
- Weight for Stature

Percentiles can be found below the graph, and they are auto calculated

- If there is no available growth chart data, a message appears and reads
"No data available for Growth Charts"
