

## CARE4 MODULE NAME: EMR Summary Panel

### Management of Implants and Explants Data

#### Overview:

In the EMR Summary Panel – patient implants and explants can be entered and tracked

- In Expense – **only new** implants/explants will be entered
- Patient data on implants/explants supports patient care and also can be used in the event of a device recall
- For patients with pre-existing implants – implant information will be captured in the Medical History portion of the Summary Panel – Enter specifics i.e., Pacemaker

The screenshot shows the 'History' section of the EMR Summary Panel. It includes a table with columns for 'Problem List', 'Onset', and 'Comment'. The first row contains the text 'Greenfield filter in place Pacemaker'. Below the table are buttons for 'Pending', 'Edit', 'Picklist', and 'Search'. A search bar contains the text 'implant', and there are filter options for 'Age Group' and 'Birth Sex'.

#### Process for Implants:

- Click on New Implanted
- Date of implant entered
- Input method can be free text or device identifier (in future scanning of device is possible)
- All fields must be filled out and then saved
- For the SUR module- implant device information is entered at time of implant

The screenshot shows the 'New Implanted' form in the EMR Summary Panel. The form includes fields for 'Input Method', 'Identifier', 'Device (Brand Name)', 'Qty', 'Site', 'Lot/Batch Number', 'Catalog', 'User', 'Comment', 'Donation ID Number', 'Manufactured Date', and 'Expiration Date'. A date picker is open, showing the month of September 2021. The '\* Implant Date' field is circled in red, and a blue arrow points from it to a separate box labeled 'Device Identifier' with 'Free Text' selected.

Device Identifier

Free Text

## Process for Explants

Very similar to implant data entry

- Click on New Explanted/Inactive
- Enter Implant Date
- Enter Explant Date
- Input method is either Device Identifier or Free Text (in future scanning of device is possible)
- All fields must be completed
- Save and file
