

CARE4 MODULE NAME: PCS

Infection Preventions and Control Special Indicators (SI's)

Special Indicators are alerts that follow a patient from visit to visit unless removed. They can be found in multiple places in the patients EMR and on your Status Board. IPAC special indicators are only editable by Infection Prevention and Control Practitioners.

The list of IPAC Special Indicators that only IPAC can add/remove are prefixed with "IPAC". You can locate SI's on the summary panel in EMR (to add/remove), view on the status board and the  icon on the patient header.
