CARE4 MODULE NAME: PCS/EDM/SUR
## Patient History (Medical Surgical and Social History)

Can be found in patients chart – under **Summary** on patients open chart

Patient History should be completed/reviewed on admission to facility or new to your department

Functionality of **MEDICAL, SURGICAL AND FAMILY HISTORY** are the same –
- Open using **Edit**
- User may use
  - **Picklist** and search under appropriate system
  - **Search function** and type in specific problem/diagnosis/disease you are looking for
- Comments may be added if needed to provide further details from problem list

Functionality of **SOCIAL HISTORY**
- Open using **Edit**
- Choose most appropriate answer(s) – each answer will allow multiple choices
- Social History may be completed by other disciplines (if they have appropriate access)

If the patient has been admitted previously to your facility or another CARE4 facility and the Patient History was completed, the user may review information and change if needed
- Last Updated and Last date and time and user will be noted
- Open using **Edit**
- Users can use **Remove** button if history is no longer relevant/pertinent for **Medical/Surgical/Family History**
- **Social History (double) click on items you wish to remove/undo**
  Note Remove button does not work
- Once Patient History has been reviewed (with or without changes) user can use **the Reviewed Med/Sur Hx** in footer
  Last Reviewed date, time and user will be updated once reviewed and changes complete
