

Pulling Medications from Preference Card

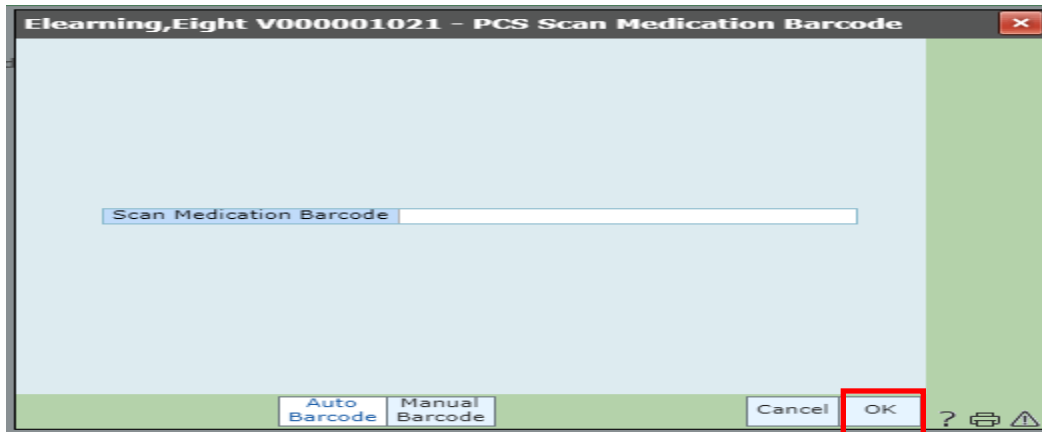

1. Need to be on the MAR tab.
2. First ensure the patient is verified (header under patient's name) by scanning armband and if the armband is not available for scanning enter the patient's account number manually by clicking on the Manual Barcode footer button.

3. Select Enter Med from footer.

4. Select OK from the footer.

5. If clinical data panel opens enter data or select OK.

Patient Clinical Data Not Recorded

The following data items have not been recorded on this patient:

- Allergies
- Height
- Weight

6. Ensure the Provider is correct, the default provider should be the Surgeon performing the surgery. It can be changed if needed by using the drop down caret from Other Provider and searching for Provider.

Enter Default Provider and Source

Provider	Source
Casas, Alberto	Conditional
Provider Group	Medical Directive
Other Provider	Preference Card
	Telephone Read Back (e-Sign)
	Therapeutic Assess/Protocol
	Verbal Order (e-Sign)
	Written Order

7. Source needs to be Preference Card.
8. Select OK.

9. Medications will appear like the following:

New Meds

Pref Card | Category | Name

<input checked="" type="checkbox"/>	Order
<input type="checkbox"/>	Marcaine E 0.25%
<input type="checkbox"/>	1 - 40 ml SUBCUT ONCE inj2
<input type="checkbox"/>	Polyderm Antibiotic ointment
<input type="checkbox"/>	1 applic TOPICAL ONCE oint
<input type="checkbox"/>	ceFAZolin 1 g premix (OR)
<input type="checkbox"/>	ceFAZolin 1 g (GBGH and RVH OR only)

10. Select the medications and Select Next.

New Meds

Pref Card | Category | Name

<input checked="" type="checkbox"/>	Order
<input type="checkbox"/>	Marcaine E 0.25%
<input checked="" type="checkbox"/>	1 - 40 ml SUBCUT ONCE inj2
<input type="checkbox"/>	Polyderm Antibiotic ointment
