

CARE4 MODULE: PCS

Regulatory Coordinators CCRS/NRS and Submissions

If you have multiple roles within your organization when logging into EXPANSE, you may have to choose the appropriate JOB

The screenshot shows the EXPANSE login page with a background image of mountains. The login form includes fields for User, Domain, Password, HCIS, and Job. The Job dropdown menu is open, showing the following options:

User	QUANUC01CG
Domain	COLLINGWOOD
Password	*****
HCIS	ROV TEST
Job	Care4 Build Team
	CG Meditech ExpansE RN
	Care4 Build Team
	CB Regulatory Coordinator

MAIN MENU – CLINICAL PANEL – PCS STATUS BOARD

Here is where you can ADD patients to your list (can add via name, location, account number etc.)

Based on your access/location your REGULATORY data (admission, re-entry forms etc.) should appear on the patients' worklist. If it isn't on the worklist – you can ADD from footer at bottom of screen – and search by name/any word

Meditech Functionality will autofill predetermined fields

For CCRS some documentation will flow through from nursing/PCS

Using  function will highlight recallable fields in green – pressing  will allow data to auto-populate

Reminder not all recallable fields will have documentation built to flow here

Then once onto MAIN MENU through CLINICAL and PATIENT CARE you will access your CIHI data submission choosing most appropriate status
