

CARE4 MODULE PCS/EDM/SUR/eMAR Navigation

Using the Return to Functionality

Overview - Meditech Expanse holds sessions for you as you open new screens – to return to or close items you can use the drop-down option under the Big “E” in the top left-hand corner.

The sessions that you have open will display in the order that you last accessed them.

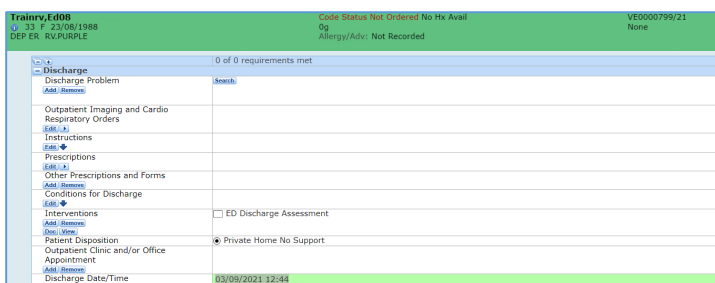

In example to the left:

1. I have My List of patients open and the My List screen of patients is visible behind the dropdown menu
2. Below that it shows that my Main Menu screen is open in the background – this is the screen where you chose the EDM tracker. Try to remember to keep this open – you may have to use it to enter a temp location

3. Next is a patient chart that I have left open which just happens to be the Discharge Routine for Trainrv,Ed08. ***** You have to use the “Return to” button or “Close” to exit this screen *****

4. The final one I have open is a WebEhr (physician tracker) as an example of having multiple applications open and available at once.
5. You can close them using the individual
