

CARE4 MODULE NAME: Sign Up Functionality

If a user is taking over as the provider for a booked appointment, they can use the sign up functionality within the AMB Clinical Home Screen.

- From the Home screen; the provider signed in and provider booked are different.

The screenshot shows the user interface for a provider named Christiann Howes, MD. The main heading is "Schedule" for "Fri 3 September 2021". A calendar view shows the date "3" selected. Below the calendar, a dropdown menu is set to "Diabetes Paediatric Innisfil". A table lists an appointment at 9:00 AM for "AMB, Three" at "Innisfil Paed Diabetes Clinic". The patient's arrival is noted as "Arrived" at "01:16". The provider listed for this appointment is "Jones, Kristi".

- Select name to sign up as the provider seeing the patient.

This is a close-up of the appointment table from the previous screenshot. The provider name "Jones, Kristi" is highlighted in yellow, indicating it is the selected provider for the appointment.

- A pop-up window appears. Enter your name in Visit Provider and SAVE.

The screenshot shows a pop-up window titled "AMB, Three". It has two sections: "Current Visit Provider" with a text field containing "Jones, Kristi", and "New Visit Provider" with an empty text field that is highlighted in yellow.

- Provider updates on Home screen.

This screenshot shows the same Home screen as before, but the provider for the 9:00 AM appointment has been updated to "Howes, Christiann". The rest of the interface, including the calendar and clinic name, remains the same.
