

CARE4 MODULE NAME: PCS/EDM eMAR

Scan to Order

Overview

When a new verbal or telephone medication order has been received from the physician for a medication that needs to be given now/stat, the scan to order process can be used.

This will streamline the workflow and allow for the order entry and medication administration to be done as one process.

Note

Scan to order can only be done on a desktop computer.

Scan to order can not be done on the TC52

- Obtain medication from ADU
- Scan patient armband to open the eMAR and verify the patient
- Select Enter Order on eMAR footer buttons
- Scan the medication barcode
- Complete the order, submit
- Medication is on eMAR as Unverified
- Acknowledge order and document
- Administer the medication, complete documentation
