

## CARE4 MODULE NAME: PCS/ IDM

### How to document the MRI Screening Questionnaire and provide the information to the Diagnostic Imaging department

#### **INPATIENT & ED ONLY (Not for ambulatory or outpatient ordering)**

The screening for patients requiring an MRI is now done electronically. This helps to make sure this information is available to all clinicians.

#### MRI Screening Intervention

When an MRI order is placed for a patient, there will also automatically be an order called "MI MRI Screening". It will appear on the worklist with "Ao" in the column on the left.

	Care Item		Last Done	Status/ Due	Mon 13 Sep 01:00
Ao	MI MRI Screening	Once	112m	-111m	
A	OB Post Delivery Epidural Spinal CSE	Q1HR	4d	-35h	

The screening is mandatory for all patients and must be done before the patient can enter the MRI. Below, you can see that there are instructions/ reminders.

**It is very important that when the screening is done, that the intervention status is set to "Complete". This is what transmits the information to the imaging department so the exam can be performed safely and without any delays.**

Assessments

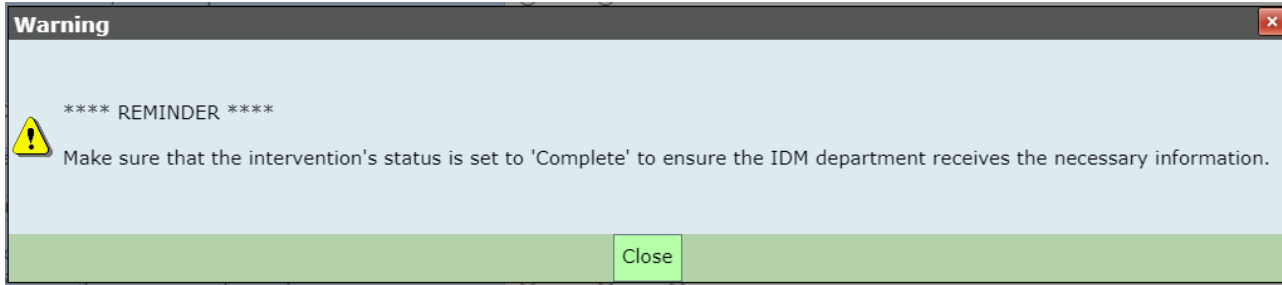

- MRI Screening Questionnaire ✓
  - Is the Patient:
    - \*\*\* This screening form is mandatory to ensure patient safety and to prevent adverse events related to MRIs \*\*\*
    - \*\*\* The following information must be obtained by the primary nurse. All questions must be answered before the patient can be scanned, this will prevent delays in results.
    - IMPORTANT: Once the screening is completed, the intervention's status must be set to "Complete" so it falls off the workload. Completing the intervention is what will send automatically send the information to the imaging department!**
    - Is Patient Able to Consent/Provide Medical History?  Yes  No
    - Is Patient Claustrophobic?  Yes  No  
If 'Yes' patient is claustrophobic please ensure sedation is ordered.
    - Is the Patient's Pain Managed/Able to Hold Still?  Yes  No  
If the patient's pain is not managed please ensure pain medication is ordered.
    - Is Patient Confused/ Non-Responsive?  Yes  No Comment: Test comment, is it long enough? Test Test abcdefga...  
If the patient is unable to answer medical history questions reliably, provide NOK/Substitute Decision Maker name and contact information (phone number). Answer all the questions in the screening checklist to 'Unknown', the MRI technologist will review the checklist with the family member.
  - Screening Checklist:  
Indicate if the patient has any of the following:
    - Any Cerebral Aneurysm Clips?  Yes  No  Unknown  
If 'Yes' provide details.
    - Aneurysm Clip Comments (Date/ Location of Surgery) Test comment, is it long enough? Test Test abcdefgahiop [pok;kj;l Last Word
    - Has the Patient Ever Had a Metal Injury to Eye Not Removed by a Doctor?  Yes  No  Unknown
    - Any Metallic Fragment or Foreign Body?  Yes  No  Unknown
    - Pacemaker/Defibrillator/ICD (now or ever)?  Yes  No  Unknown

At the bottom of the screening questions, there is a question asking the user if the screening is done. If there are still some details that are missing, answer No.

Is Screening Complete?

\*Is the MRI screening completed and ready to be sent to the diagnostic imaging department?  Yes  No

If ALL questions are answered, you can enter Yes, which will initiate another reminder.

This is a preview of what the diagnostic imaging department will receive.

**MRI Inpatient Screening Checklist**

Acct #	Age	Address
MRN	Birth Sex	
HCN		
Patient Location Seniors Care		

The following information must be obtained by the primary nurse. All questions must be answered before the patient can be scanned, this will prevent delays in results.

ALL questions must be answered before sending the report to diagnostic imaging.

**Is the patient:**

**Able to Consent/Provide Medical History?** No  
**Claustrophobic?** No  
*If 'Yes' patient is claustrophobic please ensure sedation is ordered.*  
**Pain Managed/Able to Hold Still?** Yes  
*If the patient's pain is not managed please ensure pain medication is ordered.*  
**Confused/Non-Responsive?** Y  
[Redacted], [Redacted] from the wife  
*If the patient is unable to answer medical history questions reliably, provide NOK/Substitute Decision Maker name and contact information (phone number). Answer all the questions in the screening checklist to 'Unknown', the MRI technologist will review the checklist with the family member.*

**Screening Checklist:**

**Indicate if the patient has any of the following:**

**Any Cerebral Aneurysm Clips?** No  
*If 'Yes' provide details.*  
**Aneurysm Clip Comments (Date/Location of Surgery):**  
**Any Metal Injury to Eye Not Removed by MD?** No  
**Any Metallic Fragment or Foreign Body?** Yes  
**Pacemaker/Defibrillator/ICD (Now or Ever)?** No  
**Coils, Filters, or Stents?** No  
**A Neuro-Stim. or Stimulation Device?** No  
**Intraventricular Shunt in the Head?** No  
**Any Attached Equipment (Pump/Drain/Monitor)?** No  
**Any Type of Prosthesis?** No  
*If 'Yes' provide details.*  
**Prosthesis Comments (Date/Location of Surgery):**  
**Metallic, Magnetic, or Electronic Implant?** No  
*If 'Yes' provide details.*  
**Metallic, Magnetic, or Electronic Implant Comment:** [Redacted]
