The EMR IO panel will show intake and output from all sources including IV fluids from the eMAR and from TAR

Viewing options- see options at the bottom of the screen to change views as desired.

Values can be graphed by right clicking on the IO item and clicking on graph

The screenshot shows a right-click context menu over the 'Catheter Urine Amount (mL) (2-Way)' row in the IO panel. The menu options are 'Graph', 'Graph Favorites', and 'Queue for References'. Below the menu, the 'Catheter Urine Amount (mL) (2-Way)' row is checked, and a line graph is displayed. The graph shows the volume of urine output over time, with the y-axis ranging from 0 to 2000 mL and the x-axis showing dates from 11/11/2021 to 13/11/2021. The data points fluctuate between approximately 200 and 800 mL.
