

# CARE4 MODULE NAME: OM/PCS/EDM

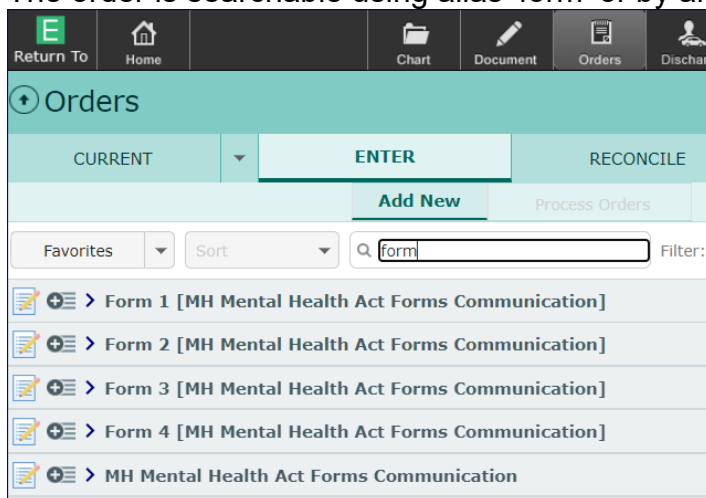

## MH Mental Health Act Forms Communication Order

### Overview

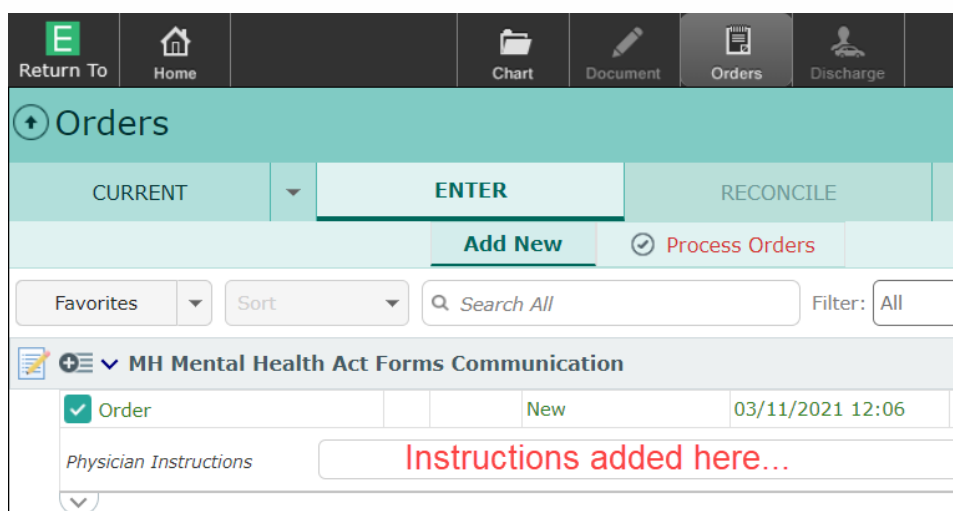

- Order is available to assist physician and clinical staff communication when a Mental Health Act Form is initiated.

### Highlight of Changes

1. Physician places the **MH Mental Health Act Forms Communication** order on an ED or Inpatient account.
  - The order is searchable using alias 'form' or by any words in the title.

- The order has a field for any 'Physician Instructions' for clinical staff.

- Once the order is placed, an indicator will display on the ED Tracker or PCS Status Board for the nursing to acknowledge. A documentation screen automatically carries over the clinical work list as part of the order. Any instructions by the physician on the order will appear (pop up box) prior to documenting. Clinical staff will then document information details based off the paper Ministry form that the physician completes.
