CARE4 MODULE NAME: PCS

Topic: Printing Home Medication Report from Discharge Plan

Overview:

On discharge, the physician completes discharge medication reconciliation, and prescriptions if required. The physician prints the prescription and signs. Nursing documents the discharge assessment which includes specific information for the patient on discharge. Nursing prints the discharge packet to give to the patient. The discharge packet includes the discharge medication reconciliation and new prescriptions. The home medication report can be printed from within the discharge plan to fax to the retail pharmacy.
