

CARE4 MODULE NAME: Physician Systems

RESIDENTS NEW ORDERING SOURCE

Overview

This document provides instructions on how Residents will be utilizing a **NEW** Ordering Source called Resident Order using Module.

Note: When residents order, they will now need to specify the ordering provider and the order source. The provider you select when ordering should be your supervising physician.

Note: Residents will need to use the order source of **“Resident Order”**.

Why is this Change Happening

This change is happening because the hospital is unable to bill for tests ordered by a physician without a billing number. The finance / diagnostic imaging group is having to manually the ordering physician from the resident to the supervising physician – which is significant workload. By changing resident access to ensure they must enter an ordering provider and order source, the hospital will be able to bill for diagnostic imaging test.

How to Order Using the New Ordering Source

- Upon entering orders on a patients chart, residents will be presented with the following screen:

Default Provider and Source Cancel Save

*Provider

Abawi,Blake Physician,ED **Rajaram,Akshay**

Q Other...

*Source

Conditional Medical Directive Preference Card **Resident Order** Therapeutic Assess/Protocol Telephone Read Back (e-Sign) Verbal Order (e-Sign) Written Order

- Select the appropriate **supervising physician** as well as the **“Resident Order”** Button when inputting Orders
- Click **“SAVE”**
- Now the orders may be entered as before
-
