

CARE4 MODULE NAME: Physician Systems

RESIDENTS NEW ORDERING SOURCE

Overview

This document provides instructions on how Physician Assistants at GBGH will be utilizing a **NEW** Ordering Source called “**Physician Assistant (GBGH)**”.

Note: ONLY GBGH Physician Assistants will need to use the order source of “**Physician Assistant (GBGH)**”. Other sites that have physician assistants can continue to use their existing order processes (e.g., RVH PAs use medical directive and/or verbal orders depending on the situation)

Why is this Change Happening

This change is happening because GBGH Physician Assistants do not have medical directives in place for the Physician Assistant to use. This order source allows all the PA orders to be tracked under a single order source and better reflects their order practices.

How to Order Using the New Ordering Source

- Upon entering orders on a patients chart, residents will be presented with the following screen:

Default Provider and Source Cancel Save

*Provider
Ward, Colin James
Q Other...

*Source
Blood Bank Protocol Conditional Medical Directive **Physician Assistant (GBGH)** Preference Card Resident Order Therapeutic Asses/Protocol Suggested Orders (e-Sign)
Telephone Read Back (e-Sign) Verbal Order (e-Sign) Written Order

- Select the appropriate **supervising physician** as well as the “**Physician Assistant (GBGH)**” Button when inputting Orders
- Click “**SAVE**”
- Now the orders may be entered
