

MEDITECH UPDATE – Acute/ED/AMB Module

Lumbar Puncture Order

Currently when ordering a Lumbar Puncture, the required lumbar puncture labs are being documented in the comments section of the order. Physicians have requested the ability to select the required labs vs having to type them out in the comment section.

What's Changing in MEDITECH?

To support this workflow, we have built a Lumbar Puncture Labs query that will display for providers to be able to select the desired labs when ordering the Lumbar Puncture.

The screenshot shows the MEDITECH interface for a Lumbar Puncture order. The order is titled "RAD Lumbar Puncture Urgent" and is in the "Ordered" state. The order date is 21/04/2022 14:49. The order is marked as "Urgent" and "New". The order was placed on 04/05/2022 10:16. The "Lumbar Puncture Labs" dropdown menu is open, showing the following options: CSF Cell Count, CSF Chemistry, CSF Culture, CSF Pressures, and CSE Specialty Studies. The "Specialty Studies (Please List)" field is also visible.

Why Is This Change Happening?

This change is occurring to ensure that the most accurate information is being captured and provided to the imaging department.

How will this change affect me?

Effective May 10, 2022, the Lumbar Puncture order will display the Lumbar Puncture Labs query. This will allow you to indicate the desired labs when ordering.

Who can I contact if I have questions or need help?

For 24/7 MEDITECH support, please contact your Help Desk and press option 1

CGMH: EXT 8888, GBGH: EXT 1410, HHCC: EXT 2901, RVH: EXT 45000
