

CARE4 MODULE NAME: Physician Systems

New Manage Transfer Defaults

Overview

Currently, all categories in the manage transfer are defaulted to STOP (except for Microbiology, Pathology, Diagnostic Imaging and Telemetry, Consults, and referral orders as this was a recent change).

There are labs and ALC orders that are being STOPPED unintentionally because physicians are accepting defaults in the transfers without reviewing.

What is Changing

When physicians enter the transfer routine, Lab and ALC orders in the **reconcile** tab, will be set to **continue** (e.g., ALC, CBC, etc.) See image below:

Orders	Ordering Provider	Start	Stop	Now
Admit/Transfer/Discharge				
ALC Alternate Level of Care (Physician) .Order	me	Upon Transfer	Stop	<input type="checkbox"/>
	me	Continue	Stop	<input type="checkbox"/>
Assessment and Monitoring
