

Setting Sensitive Visits

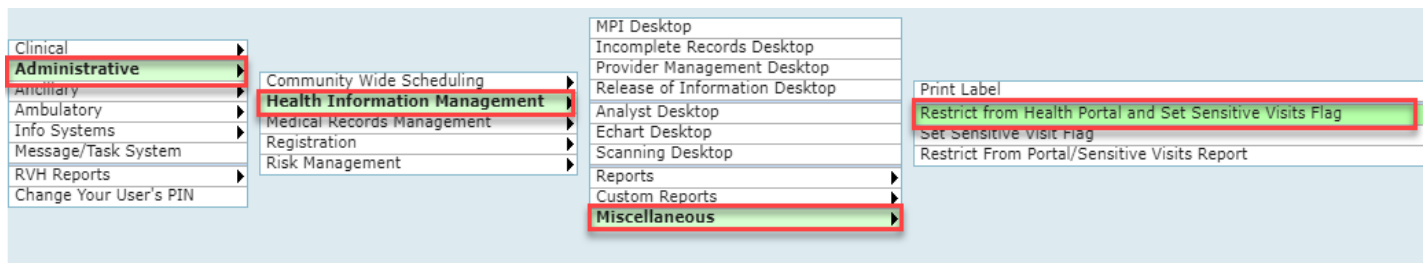

Date created: April 20, 2022

Audience: HIM Staff

Overview:

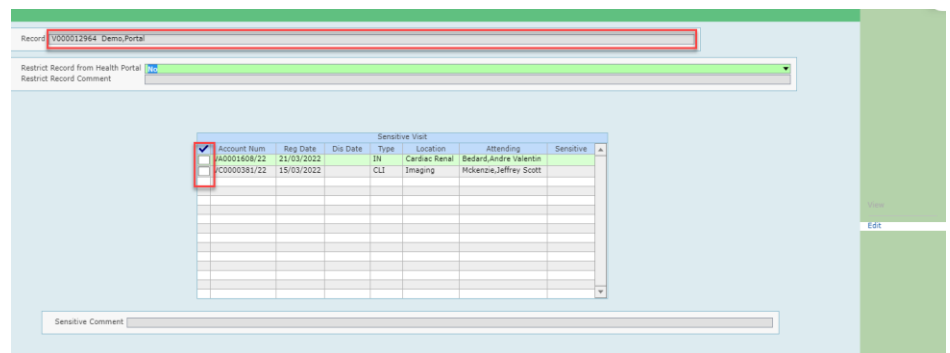

This function is used to restrict visits from my health care portal when requested by the patient.

- To restrict a visit open the **Restrict from Health Portal and Set Sensitive Visits Flag** by following the path below:

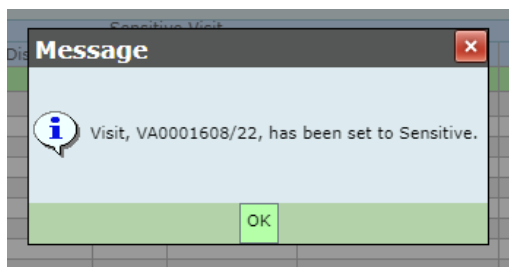

- Search for the patient in the **Record Field**
- Click to the left of the visit you would like to mark sensitive

Note: The **Restrict Record from Health Portal** will restrict the entire record from going to portal. The patient will not be able to access their portal account if this is changed to **Yes**

- Add a comment if applicable
- Click **Save**

- This pop up will appear when you have successfully restricted the visit

- You will now see that **Yes** is populating under the **Sensitive** column.

Sensitive Visit							
<input checked="" type="checkbox"/>	Account Num	Reg Date	Dis Date	Type	Location	Attending	Sensitive
<input type="checkbox"/>	VA0001608/22	21/03/2022		IN	Cardiac Renal	Bedard,Andre Valentin	Yes
<input type="checkbox"/>	VC0000381/22	15/03/2022		CLI	Imaging	Mckenzie,Jeffrey Scott	

To Remove the Sensitive Flag:

- Search for the patient in the **Record Field**
- Click to the left of the visit you would like to unflag as sensitive
- Click **Save**
- This pop up will appear to confirm the flag has been removed

Sensitive Visit							
<input checked="" type="checkbox"/>	Account Num	Reg Date	Dis Date	Type	Location	Attending	Sensitive
